

Would you want to leap out of a building?

What is a comparable fall?

Which floor?

- Hitting a pedestrian at 30 km/h
- Hitting a pedestrian at 50 km/h
- Intersection crash at 80 km/h
- Head-on at 100 km/h

Answers

What is a comparable fall?

Hitting a pedestrian at 30 km/h

1st floor fall, or falling off a house roof

What is a comparable fall?

Hitting a pedestrian at 50 km/h

3rd floor fall, no thank you

What is a comparable fall?

Intersection crash at 80 km/h

4th floor, falling onto the driver's side

What is a comparable fall?

Head-on at 100 km/h

13th floor, fall onto the front of the vehicle

Some myth busting...

Some say that two identical cars crashing head-on at 80 km/h is the same as crashing one into a wall at 160 km/h. Or is it?
